

News genomic prediction - NAV routine evaluation

1 April 2014

The latest NAV routine genomic prediction took place as scheduled. NAV carried out genomic prediction for Holstein, RDC and Jersey:

Data used in genomic prediction

Genotypes were extracted from the joint Nordic SNP data base 13th March 2014. Interbull information was from December 2013. Nordic phenotypic information for the reference population used in the genomic prediction was the same as in the 2nd February 2014 routine evaluation.

News in relation to NAV genomic prediction

Starting May 2nd 2014 the publication age for genotyped AI bulls will be 10 month
