

Correlations between claw health and selected traits

Jan-Åke Eriksson

NAV

Nordisk Avlsværdi Vurdering • Nordic Cattle Genetic Evaluation

Criterion for bulls too be included

- **Bulls born 2000 to 2005**

Claw health traits: >14 daughters and official claw health index

NTM, type traits and Other disease : Official EBVs

Correlation between claw health and NTM traits

	HOL	RDC
• Longevity	0.25	0.20
• NTM	0.20	0.05
• Other disease	0.15	0.15
• Udder health	0.15	0.10
• Feet&Legs	0.05	0.15
• Temperament	-0.05	-0.15

Correlation between claw health and rear legs side view

NAV

Nordisk Avlsværdi Vurdering • Nordic Cattle Genetic Evaluation

NAV

Nordisk Avlsværdi Vurdering • Nordic Cattle Genetic Evaluation

Correlation between claw health and type feet&legs

NAV

Nordisk Avlsværdi Vurdering • Nordic Cattle Genetic Evaluation

Summary

- Claw health has a low favourable correlation to NTM and NTM subtraits
- Selection for claw health is favourable for all fitness traits
