

News genomic prediction - NAV routine evaluation

2 June 2013

The latest NAV routine genomic prediction took place as scheduled. NAV carried out genomic prediction for Holstein, RDC and Jersey:

Data used in genomic prediction

Genotypes were extracted from the joint Nordic SNP data base May 21st 2013. Interbull information from April 2013. Nordic phenotypic information used in the genomic prediction was the same as in the 2nd May 2013 routine evaluation.

News in relation to NAV genomic prediction

Last 2-3 birth years of NRF bulls with a progeny test have been added to the reference population for RDC
