

Nordic collaboration

Nordic collaboration – why?

- › Use all interested Nordic (FDS) researchers
- › Individual researchers contribute with their specific competences
- › Individual researchers work on their favorite subject
- › Avoid double work

Nordic collaboration – how?

- › Two main meetings with all scientists a year
 - › Scientific discussions and distribution of work
- › Ad hoc extra meetings on specific subjects
- › Esa and Erling appointed as associated members in the steering committee

Nordic collaboration – how?

- › Agenda
- › General Update
- › Group discussions - session 1
 - › Cross validation methods
 - › Blending methods
 - › Genetic structure in red breeds and Genome Wide Associations
- › Group discussions - session 2
 - › Using genetic structure in genomic selection
 - › Blending methods cont.
 - › Breeding plans
 - › Mapping
- › Plenum discussions
- › Brain storm on ideas for future work
- › Concrete plans for 2010 – who does what?
