

News genomic prediction - NAV routine evaluation

1 December 2015

The latest NAV routine genomic prediction took place as scheduled. NAV carried out genomic prediction for Holstein, RDC and Jersey:

Data used in genomic prediction

Genotypes were extracted from the joint Nordic SNP data base 18th November 2015. INTERBULL information from August 2015 and national information from 3rd November 2015 run were included in the genomic prediction.
