

## **News genomic prediction - NAV routine evaluation**

### **1 March 2016**

The latest NAV routine genomic prediction took place as scheduled. NAV carried out genomic prediction for Holstein, RDC and Jersey:

#### **Data used in genomic prediction**

Genotypes were extracted from the joint Nordic SNP data base 12<sup>th</sup> February 2016. INTERBULL information from December 2015 and national information from 2<sup>nd</sup> February 2016 run were included in the genomic prediction.

#### **GEBV for young stock survival in Holstein**

NAV has identified an error in the GEBVs for young stock survival for Holstein published 2<sup>nd</sup> February 2016. The corrected GEBVs for young stock survival for Holstein is updated on the NAV search page and the national databases
