Publication criteria at national data bases

Starting point:

- **Keep current national principles for publication on national cattle databases unchanged (=what is shown for individual farmers)**

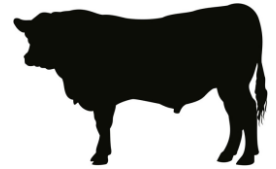

but

- **future goal when all traits and breeds are evaluated jointly is to establish and apply joint rules**

NAV

Publication on NAV search page

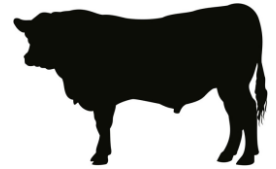

<https://nordic.mloy.fi/NavBeef>

- Possibility to have different search criteria:
 - Birth year, Sex etc
- No restriction on minimum breeding value
- Only animals for which farmers allow official publication
- Requirements on reliability/registration or offspring with registration (national lists/search pages must be aligned)
- *Details will be discussed during early spring and a joint suggestion from NAV will be distributed to key persons in each country*

NAV

Joint Nordic genetic evaluation for beef cattle

- **Joint evaluation requires joint solutions and compromises to benefit from doing things together**
- **Everything will not be exactly as in the past nationally**
